

# **CMT153S/CMR153S**

160W Mid-distance Magnetic Resonant Wireless Power 54.6V/3A Output Transceiver Module

CMT153S/CMR153S transceiver module set consists of a transmitter module and a receiver module, carefully tuned to be highly resonant with each other to accomplish efficient wireless power transfer.

The transmitter module transmits "resonant power" from the surface area of its antenna (coil) defined by X & Y = power area and to a Z= height, which is the distance from the antenna surface. The receiver module, when positioned within the space defined by X,Y and Z, receives the resonant power and performs the necessary conversions to supply to a system which can be robot, E-bike, E-scooter...etc.

#### **Key Features:**

- Provide typical 160W output power with low frequency magnetic resonant wireless power technology
- Proprietary BLE signaling protocol
- 1.0cm~2.0cm Z-height spatial freedom to keep consistent DC to DC end to end high wireless power transfer efficiency.
- XY freedom=± 1cm while coil to coil distance=1.5cm
- Battery Charger mode to charge the 48V battery directly is configured by firmware.
- Special ferrite (90x90x2mm PMB, manufactured by SK Chemical, Korea) is used with RX coil to avoid crack in vibration condition.
- Extra LED board is attached to the PTU to provide signaling and battery level indication.

## **Specification:**

| Power Input Interface   | DC jack  |  |
|-------------------------|--|--|
| Input Power Requirement | DC: 48V 5A                                       |  |
| Output Power            | 160 W typ., up to 54.6V/3A. delivery to the load |  |
| Power coil Area (X & Y) | 106 mm (l) x 106 mm (w)                          |  |
| Power Distance (Z)      | 10 mm ~ 20 mm (coil to coil)                     |  |
| Transmitter dimension   | Control board: 80 mm (I) x 80 mm (w) x 15 mm (h) |  |
|                         | Coil board: 106 mm (I) x 106 mm (w) x 6 mm (h)   |  |
| Receiver dimension      | Control Board: 80 mm (l) x 80 mm (w) x 15 mm (h) |  |
|                         | Coil Board: 90 mm (I) x 90 mm (w) x 6 mm (h)     |  |
| Coil Type               | Litz-wire wound with ferrite                     |  |

## **Electrical Specification:**

| Characteristics Condition |                           | Min | Тур  | Max | Unit  |
|---------------------------|---------------------------|-----|------|-----|-------|
| Input Voltage             |                           | 46  | 48   | 50  | Volt. |
| Rated Input Current       |                           |     | 5    |     | Amp.  |
| PRU Output Power          |                           |     | 160  |     | W     |
| Output Voltage            | @Voltage source mode      | 52  | 54.6 | 57  | Volt. |
| Constant Current (CC)     | @Battery charger mode     |     | 3    |     | Amp.  |
| Constant Voltage (CV)     |                           |     | 54.6 |     | Volt. |
| Charging Distance (Z)     | PTU Coil to PRU coil      | 10  |      | 20  | mm    |
| Charging XY freedom       | @ Z=15mm                  | -10 |      | +10 | mm    |
| Efficiency                | System DC-DC efficiency @ |     | 85   |     | %     |
|                           | Z=15mm & XY=0mm           |     |      |     |       |
| Over Power Protection     |                           |     | 180  |     | W     |
| (OPP)                     |                           |     |      |     |       |
| Over Temperature          |                           |     |      | 90  | °C    |
| Protection (OTP)          |                           |     |      |     |       |

## **Environmental Specification:**

• Operating Condition:

Temperature range:  $-20^{\circ}$ C  $\sim +50^{\circ}$ C

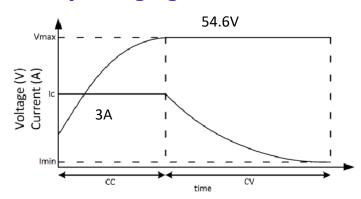

Humidity: 10% ~ 90 %

Storage Condition:

Temperature range:  $-40^{\circ}$ C ~  $+70^{\circ}$ C

Humidity: 10% ~ 90 %

## WIRELESS POWER MODULE

### **Important Notice:**

- (1) Coil-to-coil distance (i.e., Z-height or charging distance) should be kept within the specification to avoid board damage.
- (2) Keep PTU coil away from the large metal area

Please keep any large metal area at least 10cm away from the PTU coil board at all directions. It's suggested NOT to put the PTU coil board on the metallic desk surface, or please lift the PTU coil board 10cm away from the metallic desk surface without any metal object in between.

(3) Keep PTU coil away from each other if multiple PTUs are turned on

Please ensure the edge to edge distance between any two PTU coil boards on the same surface is longer than 30cm. And DON'T overlap any two PTU coil boards at the vertical direction.

(4) Don't put foreign objects on top of the PTU coil area

Please keep the foreign objects away from the top of the PTU coil area or they can be heated to quite high temperature. The foreign objects include metallic objects, ID cards, credit cards, deposit cards, security badges, passports, and key fobs. However, the glass with low-E coatings are not foreign objects and won't be heated.
